

# Naval Research Laboratory

Washington, DC 20375-5320    NRL Publication NRL/PU/1001-95-285    November 1995

## NRL Major Facilities

DISTRIBUTION STATEMENT A

Approved for public release; Distribution Unlimited

# DISCLAIMER NOTICE

**THIS DOCUMENT IS BEST QUALITY AVAILABLE. THE COPY FURNISHED TO DTIC CONTAINED A SIGNIFICANT NUMBER OF PAGES WHICH DO NOT REPRODUCE LEGIBLY.**

This publication has been designed to allow each directorate to highlight major research areas and to promote an intercooperative use of these areas between Laboratory scientists and other agencies. Because the brief descriptions give only a general overview of the wide range of tests NRL can accommodate, the prospective user is invited to contact the individuals identified with each facility for additional information.

This is the first NRL publication to be created entirely electronically. The text was scanned and edited in MS Word and was then imported into PageMaker 5.0 on the Macintosh. Original and copy negatives of the facilities were scanned, digitized, and placed on Kodak Photo CDs. The digital images were opened from the Photo CD, converted from RGB to grayscale, electronically enhanced, and saved as 300 dpi grayscale images in Adobe Photoshop. They were then dropped into the PageMaker layouts containing text. The entire digital file with linked grayscale images was produced in negative form on a Linotronic 330 imagesetter and sent to a commercial printer for offset printing.

#### *On the Cover:*

1. Visualization Laboratory - Code 5707, p. 77
2. The Connection Machine - Code 5590.3, p. 43
3. Radio Frequency Anechoic Chamber Facility - Code 8130.3, p. 315
4. Nike KrF Laser Facility - Code 6730, p. 173
5. Optical Device Fabrication Facility - Code 5671, p. 67
6. GOES Antenna - Code 7540, p. 277
7. Millimeter-Wave Atmospheric Sounder - Code 7227, p. 241
